

2.1 Daily State

Field Name	Data Type	Description	Rationale	Example
energy_level	int	Self-reported energy level	Match task difficulty to capacity	7
mood	str	Current mood	Mental state modeling	calm
stress_level	int	Perceived stress	Burnout detection	5
focus_level	int	Ability to concentrate	Focus-aware planning	8
day_constraints	list[str]	Daily limitations	Prevent unrealistic plans	["travel"]

Validation

- Scores range from 1 to 10
- Constraints must match predefined enums

2.2 Tasks

Field Name	Data Type	Description	Rationale	Example
<code>task_id</code>	str	Unique identifier	Task tracking	tsk_1023
<code>task_title</code>	str	Task name	User clarity	Write report
<code>task_category</code>	str	Task type	Categorization	work
<code>effort_level</code>	int	Required effort	Energy matching	6
<code>estimated_duration_min</code>	int	Time estimate	Scheduling accuracy	90
<code>deadline</code>	datetime or null	Due date	Urgency modeling	2026-02-01
<code>dependencies</code>	list[str]	Blocking tasks	Dependency resolution	["tsk_1001"]
<code>is_recurring</code>	bool	Repetition flag	Routine detection	false
<code>recurrence_rule</code>	str or null	Recurrence logic	Automation	FREQ=WEEKLY
<code>manual_priority_override</code>	int or null	User priority	Respect intent	1

2.3 Calendar Events

Field Name	Data Type	Description	Rationale	Example
event_id	str	Event ID	Tracking	evt_552
event_title	str	Event name	Context	Team meeting
start_time	datetime	Start time	Scheduling	10:00
end_time	datetime	End time	Duration	11:00
is_fixed	bool	Movable flag	Rescheduling	true
importance_level	int	Priority	Conflict resolution	8
travel_required	bool	Travel needed	Buffer planning	true

2.4 Goals

Field Name	Data Type	Description	Rationale	Example
goal_id	str	Goal ID	Tracking	goal_21
goal_title	str	Goal name	Clarity	Improve fitness
goal_type	str	Time horizon	Planning scope	long_term
goal_priority_weight	float	Importance weight	AI weighting	0.9
goal_start_date	date	Start date	Timeline	2026-01-01
goal_target_date	date or null	Target date	Deadline awareness	2026-06-01

2.5 Routines

Field Name	Data Type	Description	Rationale	Example
<code>routine_id</code>	str	Routine ID	Tracking	rtn_07
<code>routine_name</code>	str	Routine name	UX clarity	Morning workout
<code>routine_type</code>	str	Routine category	Analysis	physical
<code>routine_tasks</code>	list[str]	Linked tasks	Execution mapping	["tsk_500"]
<code>skip_reason</code>	str or null	Skip cause	Optimization	low energy

2.6 Physical Inputs

Field Name	Data Type	Description	Rationale	Example
<code>sleep_duration_hours</code>	float	Sleep hours	Recovery modeling	6.5
<code>sleep_quality_score</code>	int	Sleep quality	Fatigue estimation	7
<code>steps_count</code>	int	Daily steps	Activity tracking	8200
<code>workout_done</code>	bool	Workout completed	Habit tracking	true
<code>fatigue_level</code>	int	Physical fatigue	Load adjustment	6

2.7 Mental Inputs

Field Name	Data Type	Description	Rationale	Example
mood_label	str	Emotional state	Sentiment modeling	anxious
stress_score	int	Stress intensity	Burnout detection	7
anxiety_score	int	Anxiety level	Risk modeling	6
mental_load_score	int	Cognitive load	Task throttling	8

2.8 Journal Entries

Field Name	Data Type	Description	Rationale	Example
journal_entry_id	str	Entry ID	Traceability	jrnل_901
journal_text	str	Journal content	Sentiment analysis	Felt overwhelmed
journal_tags	list[str]	Topic tags	Pattern detection	["stress"]
is_private	bool	Privacy flag	Data protection	true
